Prevent increasing of the leaked quantity. Do not let the product enter the sewerage, surface and ground water and soil. Upon a more extensive leak of the product into the environment, proceed according to local regulations and contact the respective departments of local authorities.

The product is hazardous for the environment.

**6.3 Methods and material for containment and cleaning up**

Upon a leak of the aerosol/gas, secure sufficient ventilation of the premises. In case of insufficient ventilation, explosive mixtures of vapours with air may be created.

Active mixture:

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust) and place into suitable and marked vessels.

Protect health against exposure of contained substances from the atmosphere, see the limit values of exposure, which are stated in Section 8.
