FORCE.BIKE

HISTORY

KCK CYKLOSPORT

In the early 90s, before the establishment of KCK Ltd., the company was a small cycling shop in Zlín. The shop gained great popularity among cyclists, and so in 1991, the company KCK Cyklosport-Mode Ltd. was founded. It focused on retail and wholesale sales. There was a need for new premises, so a new building was built in Zlín-Prštné. The company continued building a solid position on the market and gained a good reputation among customers. In 1997 a second building with a warehouse was added.

As the company grew and continued to satisfy its customers with an increasing range of better service and more products, it had to move again for capacity reasons. In 2005, the company moved its headquarters to the industrial zone of Zlín-Přiluky to fully meet the growing number of orders from its customers. The company ceased retail sales and started to specialise only as a wholesaler.

In 2013, we participated in the first Eurobike exhibition abroad in Friedrichshafen, which started cooperation with many foreign customers.

In 2015, the company decided to move its headquarters to Otrokovice, to a new building with modern offices and a warehouse of 3,000 m² equipped with a modern WMS system. In the same year, we also replaced the information system, moved to a managed warehouse and launched a new B2B.

FORCE

In the early 1990s, just after KCK Cyklosport-Mode was founded, the idea of having our own cycling brand was born. Not much time passed and the idea became reality. In 1991, the FORCE was launched. From the very beginning, the main mission of the brand was to develop and produce its own cycling components and accessories. Today, the FORCE brand is one of the largest suppliers of cycling products not only in the Czech Republic, but also abroad. The quality of these parts supports the fact that FORCE products are chosen by many professional racing teams, not only Czech ones but also foreign ones.

The year 2021 was a huge turning point in these collaborations. The first cooperation is with the most successful Czech road team ELKOV KASPER, which includes the current champion of the Czech Republic Michael Kukrle and Jan Bárta, who is a participant in all three Grand Tour races. However, our second collaboration brings what every brand associated with cycling dreams of - a connection with the World Tour team! In 2021, FORCE managed to negotiate a partnership with the Belgian team Intermarké-Wanty-Gobert Matériaux, which takes part in all World Tour races. The team has achieved excellent results in 2021, such as winning a stage at Giro d'Italia or holding a red jersey for several stages at the Vuelta. This successful collaboration continues in 2022.
